Construction Waste Services Application Form

Construction Waste dumpsters in the City of Frisco must be serviced through scheduling at City of Frisco. For processing, this application requires all blanks to be filled in and an understanding of the service agreements with the City including a \$1,000 deposit for each trash dumpster. Deposits can be made in cash, check or credit card (MasterCard, AMEX, or Discover) + a 2% service fee. Cash deposits can be made in person or overnight mail can be sent to 6616 Walnut Street, 8 a.m. - 4 p.m. Monday through Friday. Checks can be mailed to City of Frisco C/O Environmental Services, 6101 Frisco Square Blvd, Frisco TX 75034. Payments by phone with a credit card must be made to 972-292-5900; 2% service fee applies. Any remaining balance will be mailed to the provided address within 2-4 weeks of the final bill. To request a final haul, all outstanding balances must be paid in full. To avoid delays, inquire about a final balance 1-2 business days prior to needing the can removed. No final removals can be completed with an outstanding balance. Completed applications and deposits must be received by 2 p.m. for next-day delivery.

☐ This is an add-on dumpster to an active account (please fill in account number above)

Open Top Service Rules

Unacceptable Waste: Per city ordinance §06-20-110, no waste concrete or metal shall be disposed of in a landfill. All unused concrete and metal shall be kept clean and stored separately in containers on site to comply with the City's waste diversion requirements. Recycling is open market in Frisco; for more information on construction trash and recycling, call 972-292-5915.

City of Frisco Environmental Services handles all service requests. Call 972-292-5900 (have the 88- account number ready). All orders must be made by 2 p.m. to get onto the next day's schedule. Same-day service is not available. Service limitations: limited schedule on Saturdays, no services on Sunday, scheduling is not available on City of Frisco recognized holidays: New Year's Day, Memorial Day, 4th of July, Labor Day, Thanksgiving, Christmas Eve, and Christmas. Scheduling is available for requested days, not times.

General information about dumpster use: (not following these guidelines can result in unable-to-haul fees)

- Load container evenly; container's contents must not exceed top rail (will incur unable-to-haul fee).
- Do not overload container; those over 10 tons cannot be hauled and must be unloaded by customer.
- Note: containers with dirt, roofing, ceramic tiles and carpet can reach max weight at $\frac{1}{4}$ - $\frac{1}{2}$ full.
- The container must be placed on a hard, level surface.
- Containers cannot be located on gravel roadway. Due to inclement weather, some service locations may experience delays during heavy rain events.
- Minimum clearance of 22' overhead and 30' in front of the container are required.
- Vehicles cannot be blocking the container.
- Loads must be free of contaminants including: tires, hazardous waste, paint, liquids, tree stumps, automobile parts, animal carcasses, or items with Freon before the container is serviced.
- Customer must ensure private property can withstand the weight of the truck (~15.5 tons) plus the weight of the filled container.
- To relocate, the customer must call in with specific placement on the same job site.
- Each new jobsite (i.e. different address) will require a new application and deposit.
- Each new container will require a new deposit and updating information on the application.
- Overloaded containers are not only illegal to haul, but pose a danger. Waste Connections drivers maintain the right to deem what is safe to haul. Loads that are unsafe to haul are at the cost and responsibility of the jobsite to unload and call back in for a pickup.
- Containers are rentals, customers are responsible for damage caused to property by improper use.

TCEQ General Permit TXR150000 §G(c) *"Minimize the exposure of waste materials by closing waste container lids at the end of the work day. For waste containers that do not have lids, where the container itself is not sufficiently secure enough to prevent the discharge of pollutants absent a cover and could leak, the permittee must provide either a cover (e.g., a tarp, plastic sheeting, temporary roof) to minimize exposure of wastes to precipitation, or a similarly effective means designed to minimize the discharge of pollutants (e.g., secondary containment)"*

Waste diversion helps keep your trash bill down and can help your building obtain LEED certification. City of Frisco is open-market for all recycling, please contact City of Frisco or state licensed vendors on recycling common construction debris including: concrete, brick, wood, metal, glass, and plasterboard. For more information on waste diversion, please contact City of Frisco Construction Waste Specialist at 972-292-5915.

☐ I have read and understand all guidelines and costs associated with not following above guidelines.
